SUMMARY

Hi! My name is Jeongtae Lee, I am graduating with the industrial design program at ASU Herberger Institute for design and the arts. I have a passion for the automotive industry, my purpose is to participate in the car design field, contribute to innovation through rapidly developing technology. My previous studies make my skillset to work in the design industry well. I started to learn art and Fundamental sketching skills in middle school. Also, in my college, I learned not only design skills but also human factors, Ecology & social equity, and so on. Through college education, I could realize that design is related to a lot of things. I felt the attractiveness of creating because the design is not only artwork but also 'making things better' for users.

EDUCATION

SUNHWA ARTS SCHOOL, SOUTH KOREA -2012

BEIJING NUMBER TWO YIZHUANG HIGH SCHOOL, CHINA -2015

- GPA: 3.23

REPUBLIC OF KOREA MARINE CORPS 2017-2019

SERGEANT

- HONORBLY DISCHARGED

Experience

12th Interdisciplinary Cluster Competition 2020 Spring

- In-School group project made up of design school students, we were assigned to make an idea of what a "smart" campus that is more inclusive and "connected" would feel and look like. We were a team of architecture and industrial design students, our solution was a 'food truck' festival that connects all ASU students include online students in the U.S.
